

**Jarxia D. Hawksw.**

After Harris 1995

**1. Ascospores (23-)25-28 x (5.5-)6.5-7(-8.5) um.** On Ilex. Florida, Texas. .... J. thelenula (Mull. Arg.) D. Hawksw.

**1. Ascospores 17-21 x 5-7 um.** On Ilex. Florida. .... J. ilicicola R. C. Harris

**J. ilicicola**

Thallus indicated by grayish blotch on bark, with blackish antagonism zone. Ascomata scattered, hemispherical to subglobose, superficial to ca. ½ immersed, 0.15-0.2 mm diam.; wall not melanized at base. Asci obpyriform, ca. 60 x 20-30 um, with irregularly arranged ascospores. Ascospores yellow-brown, 2-celled, rarely? 4-celled in age, 17-21 x 5-7 um, finely granular ornamented. Microconidia not found.
